

COVID-19

Protecting You and Your Loved Ones

We're screening visitors to our hospitals and clinics to prevent the spread of illness to health care providers, other patients, your family, and the broader community.

If you are sick or think you've been exposed

Not everyone needs to be tested. If your symptoms are mild, you should **stay home and self-isolate.**

If you're concerned that you've been exposed or have a question about COVID-19, you can call the COVID-19 Hotline.

North Carolina

COVID-19 Hotline:

866-462-3821

24 hours, seven days a week

If you need medical attention

Call Ahead Before Seeking Care

- If your symptoms worsen and you need to be seen by a provider, call ahead.
- You may get special instructions so your doctor's office or urgent care center can provide you care while protecting others.
- If you are told to go to a medical facility, wear a facemask if you have one.
- If you do not have a facemask, request one upon arrival.

Secure, Online Patient Portal

- Please visit our Patient Portal to:
 - request an appointment
 - medication refill request
 - secure communication with medical staff
 - 24-hour access to your personal health information

COVID-19

Help protect against spreading illness

Symptoms of COVID-19 include:

Cough

100.4° +

Fever

Shortness of Breath

The virus usually spreads from close person-to-person contact through respiratory droplets from coughing and sneezing.

14
days

Symptoms may develop within 14 days of exposure to the illness.

The best way to protect yourself

Wash your hands frequently and thoroughly using soap and water for at least 20 seconds. Use alcohol-based hand sanitizer if soap and water aren't available.

Cough or sneeze into a tissue or flexed elbow, then throw the tissue in the trash.

Avoid touching your eyes, nose or mouth with unwashed hands.

Avoid close contact with people who are sick, sneezing or coughing.

Stay home when you are sick.

Clean and disinfect surfaces and objects people frequently touch.

Only wear a face mask if you have respiratory symptoms or are caring for someone with respiratory symptoms.

If you need to call 911

If you have a medical emergency, let the dispatch know you have or are being evaluated for COVID-19.

If possible, wear a facemask before emergency medical service personnel arrive.
